# Does the distance from an object to a light source affect the size of a shadow?

Our question

How does the distance between the light sorce and the object affect the size of the shadow

My prediction

I think that the closer the light source the bigger the shadow will be.

| Change | Measure | Keep the same |
|---|---|---|
| the distance between the light and object. | the shadow | Object<br>light sorce<br>Distance between object and |

Our results

| Distance between torch and object (cm) | Width of shadow (cm) |
|---|---|
| 20 cm | 5 cm |
| 40 cm | 4 cm |
| 60 cm | 3 and ½ cm |

Conclusion

The results show that the distance of the distance of the light source does affect the size of the shadow

The further the distance the smaller the shadow.

# SCHOOL PRAYER

Dear God,

Thank you for our school community,

For our friends and family

And those who help us to Nurture, Progress and Excel.

Bless our school.

Help us all to follow your ways,

Be kind to others and to always do our best,

So that we may have life in all its fullness.

Amen
